**RP SOLUTIONS CERTIFIES TPG A776 PRINTER/SCANNER
FOR DISTRIBUTED CHECK CAPTURE**

New check imaging hardware option for banks and businesses

December 12, 2007 (Ithaca, NY) – RP Solutions, Inc. a leading software developer and solutions provider for electronic and image based item and payment processing, announced that it has certified the TPG A776 receipt/slip printer with integrated check scanner for use with its suite of products. It is ideal for customers with teller, POS or cashiering stations who want to image checks at their very earliest point of physical presentment – right as they are received from the customer. TPG (Transaction Printer Group) is a designer and manufacturer of thermal and impact Banking and POS/Retail printers.

“Unlike the check scanners that currently dominate the Check 21 market and only image checks, the TPG A776 has the features of both a receipt/slip printer and a check scanner in one unit,” said David Johnson, President, RP Solutions. “Many POS and teller stations don’t have the space to add a second device for check scanning. With the A776, they don’t have to. It is a cost effective printer/scanner with many features packaged in a small footprint.”

The A776 has a fast (200 mm/sec) thermal receipt printer that can print in monochrome or two colors, an impact slip station that accepts forms and checks and an integrated MICR reader. The single feed check scanner option images both sides of a check in one pass creating image files ready for Check 21 processing. The imaging module is field upgradable. The A776 also has the capability of scanning laminated ID cards, eliminating the need for the cashier to hand write this information on each check. Scanning an ID can act as a fraud deterrent, while the ID image can be referenced later for funds recovery.

“We integrated the A776 with our solutions to offer a new scanner option with unique benefits to financial institutions and businesses in a distributed environment,” Johnson continued. The device is approved for RP Solutions’ payment and deposit processing applications including ExpertRPS, ExpertCHK and AR Express™.

AR Express is a trademark of RP Solutions, Inc.

ABOUT RP SOLUTIONS, INC.

RP Solutions, Inc., based in Ithaca, NY, is a leading software developer and provider of solutions for image based item and remittance processing, remote deposit capture, ATM deposit balancing and archiving.
